Product Glue Board for Well Fly Trap

Code EFK-WSB30-B

Document Ref: TDS-502
Date: 03/11/15
Version: 1

Description

Glue Boards for Well Fly Trap contain a tricosene attractant to lure the fly for monitoring and containment purposes. When used in conjunction with the Well Fly Trap light system, this makes for a powerful attractant combination. The black board contains a grid for ease of catch count.

Active ingredient Tricosene attractant.

Inert ingredient Hot melt pressure sensitive 1882 UV eco block and craftboard.

Longevity Dependent on storage. Once in use replace every 4-6 weeks.

Packaging 10 boards per pack

Dimensions: 460mm x 300mm

Target pests: Common house fly pests e.g. *Musca domestica*.

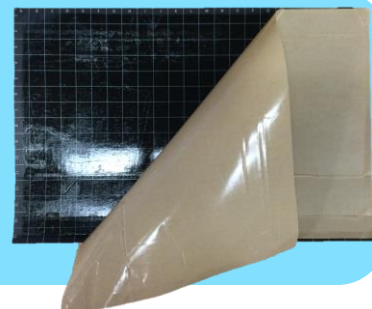

Colour: Black with white grid

Application

Trap density Use the glue board with suitable trap such as Well Fly trap. Follow trap manufacturer instructions.

Trap application Remove the protective layer and fold the base of the board along the serrated edges. Insert into Well Fly trap. Use the grid to count fly capture for monitoring purposes.

Where to use For application in food processing facilities and other areas where flies may be a problem.

Storage

Store at room temperature in a dry place.

Replacement and disposal

Replace the board every 6-8 weeks or once full with insects, whichever occurs first.

Dispose of the board away from the area to prevent interference with monitoring.

Precautions

Wash hands after contact.

Take care if in use around small children.
