

**SAFETY DATA SHEET****Protect<sup>®</sup> wax block extruded bait**

Date: 12/11/2015

Version no. 4

---

---

**SECTION 1: Identification of the substance and of the company**

---

---

**1.1 Mixture identifier:**Protect<sup>®</sup> wax block extruded**1.2. Relevant identified uses of the substance or mixture and uses advised against**

To be used for rat and mouse control.

**1.3. Details of the supplier of the safety data sheet:**

Babolna Bioenvironmental Centre Ltd.

Address: H-1107 Budapest, Szállás u. 6.

Tel.: (36-1) 43-20-400

Fax.: (36-1) 43-20-401

e-mail: info@babolna-bio.com

---

**1.4. Emergency telephone number:**

Emergency telephone: +36 1 432 0400 (working hours)

---

---

**SECTION 2: Hazards identification**

---

---

**2.1. Classification of the mixture:****According to Regulation (EC) No 1272/2008:**

Hazard classification and category: STOT RE 2

Hazard symbol:

Signal word:

Warning

Hazard statements:  
repeated exposure.

H373 May cause damage to organs through prolonged or

## 2.2. Label elements

Hazard symbol:

Signal word: Warning

Hazard statements: H373 May cause damage to organs through prolonged or repeated exposure.

Precautionary statements:

**P102** Keep out of reach of children.

**P262** Do not get in eyes, on skin, or on clothing.

**P270** Do not eat, drink or smoke when using this product.

**P280** Wear protective gloves (only professionals! )

**P301 + P310** IF SWALLOWED: Immediately call a POISON CENTER or doctor

**P501** Dispose of contents and container in accordance with the local requirements / the instruction of the label

## 2.3. Other hazards

Not known. According to Annex XIII, the mixture does not match the criteria of persistent and bioaccumulative and toxic (PBT) substances nor very persistent and very bioaccumulative (vPvB) substances.

## SECTION 3: Composition/information on ingredients

Ingredients	%	EC number	CAS number	Classification according to 1272/2008/EC regulation	
				Hazard class and category code	Hazard identification codes
Bromadiolone	0.005	249-205-9	28772-56-7	Acute Tox. 1oral Acute Tox. 1 dermal, Acute Tox 1 inhalation, STOT RE. 1 Aquatic Acut 1 M-factor 1 Aquatic Chronic1	H300, H310, H330 H372 H400 H411

---

---

## SECTION 4: First aid measures

---

---

### 4.1. Description of first aid measures

#### 4.1.1.

Inhalation: Not relevant

Skin: Remove any contaminated clothing items and wash them before wearing them again. Wash skin with large amount of water and soap. Consult a physician if symptoms persist.

Eye: Keep the eye open by using your fingers and wash your eye thoroughly with large amount of water for a couple of minutes. If you wear contact lenses, remove them immediately. Consult a physician if symptoms persist.

Ingestion: Due to bitter taste, swallowing is unlikely.  
Seek medical advice immediately and show the container, label or safety data sheet of the product. Induce vomiting only if your physician ordered you to do so. Wash your mouth thoroughly. Do not eat or drink! Rest in a warm place and consult your doctor.  
Do not give anything by mouth to an unconscious person.  
Do not administer large quantities (1-2 litres) of liquid at once, milk or substances containing fat and alcohol.

#### 4.1.2.

As the mixture contains anticoagulant active ingredient, blood coagulation disorders may occur when ingested. The bitter additive considerably reduces the probability of incidental consumption. Symptoms of intoxications: Sickness, pale skin, vomiting, haemophilia, bleeding mycoderm, melaena and haematuria, diarrhea, bleeding of nose and gums, internal haemorrhage. The effects appear progressively, within 12-18 hours from ingestion.

**In case of possible intoxication or suspicion thereof get immediate medical attention!**

ANTIDOTE: K<sub>1</sub>-vitamin / Konakion inj./

Removal and treatment of the shoes and clothes of the exposed person are not necessary immediately. After the first aid treatment wash the contaminated clothes.

Protective clothes and equipment is not necessary for the first-aider.

### 4.2. Most important symptoms and effects, both acute and delayed

See 4.1.2.

#### 4.3. Indication of any immediate medical attention and special treatment needed

##### **Instructions to physicians:**

Pharmacodynamic action: the active substance of the product is a competitive antagonist of Vitamin K and reduces the hepatic synthesis of Vitamin K-dependent factors. Following ingestion, the product may reduce coagulation and cause internal bleeding. There may be several days between the exposure and the appearance of symptoms. Give Vitamin K1 to the patient, if you notice the characteristic symptoms of bromadiolone poisoning (nasal bleeding, gum bleeding, haematuria (blood in urine), longer coagulation time, hematomas of bigger extent or of greater frequencies, suddenly appearing, unusual visceral pain). If bleeding is not noticeable, the prothrombin time (INR) needs to be measured within 48-72 hours following exposition. If the prothrombin time is greater than 4 hours, the patient needs to get Vitamin K1 intravenously.

Treatment: in case of ingestion of large quantities, induce vomiting, perform gastric lavage and monitor prothrombin activity; if it reduces, give Vitamin K. The efficacy of the treatment needs to be monitored by laboratory measurements.

Contraindications: anticoagulants.

---

---

### SECTION 5: FIREFIGHTING MEASURES

---

---

#### 5.1. Extinguishing media

Suitable extinguishing media: dry powder, CO<sub>2</sub> and foam

If necessary, fire-fighting can be done with water as well.

Unsuitable extinguishing media for safety: -

#### 5.2. Special hazards arising from the substance or mixture

As during combustion of any substance, toxic fumes containing carbon monoxide may form.

No special fire-fighting measures are necessary.

#### 5.3. Advice for fire-fighters

Wear the usual protective equipment and use self-contained breathing apparatus in indoor areas.

---

---

## SECTION 6: ACCIDENTAL RELEASE MEASURES

---

---

### 6.1. Personal precautions, protective equipment and emergency procedures

#### 6.1.1. In case of non-emergency personnel

- Use of protective gloves is recommended.
- Evacuation of the area, experts' consultancy are not necessary.

#### 6.1.2. In case of emergency personnel:

Emergency attendance is not necessary.

### 6.2. Environmental precautions

Avoid contamination of natural waters.

### 6.3. Methods and material for containment and cleaning up

6.3.1. Demarcation of the area is not necessary.

6.3.2 Shovel into lockup and labelled container.  
Further handling according to Section 13.

---

---

## SECTION 7: HANDLING AND STORAGE

---

---

### 7.1 Precautions for safe handling

7.1.1 Keep out of reach of the children and domestic animals.

7.1.2 It is prohibited to eat, drink or smoke during work.  
Wash you hands thoroughly after work.

### 7.2 Conditions for safe storage, including any incompatibilities

- in a cool and dry place, away from sunlight and moisture
- keep away from children and animals
- keep away from food, drink and animal feeding stuffs

7.3 Specific end use(s): the mixture should be used as rodenticide product  
See on the label text for instruction.

---

---

## SECTION 8: EXPOSURE CONTROLS / PERSONAL PROTECTION

---

---

### 8.1. Control parameters

Occupational Exposure Limit is not established.

### 8.2. Personal precautions, personal protective equipment

Eye / face protection: not necessary

Hand protection: For professional users, wearing of protective gloves is obligatory.  
No special regulation as for the material of the gloves.

---

---

## SECTION 9: PHYSICAL AND CHEMICAL PROPERTIES

---

---

### 9.1. Information on basic physical and chemical properties

- a) Appearance: Red coloured wax block
- b) Odour:
- c) Odour threshold: NA
- d) pH: 6.53 (in 1 g mixture /100 ml water) at 20°C
- e) Melting point/freezing point: NA
- f) Initial boiling point and boiling range: NA
- g) Flash point: NA
- h) Evaporation rate: NA
- i) Flammability (solid, gas); Not highly flammable
- j) Upper/lower flammability or explosive limits: NA
- k) Vapour pressure: NA
- l) Vapour density: NA
- m) Relative density: 1.15
- n) Solubility(ies): NA
- o) Partition coefficient: n-octanol/water; NA
- p) Auto-ignition temperature: NA
- q) Decomposition temperature: NA
- r) Viscosity: NA
- s) Explosive properties: Not expected
- t) Oxidising properties: Not expected

9.2, Other information: NA

---

---

## SECTION 10: STABILITY AND REACTIVITY

---

---

### 10.1. Reactivity

The mixture has no such property which would represent hazards resulting from reactivity. Hazardous incompatibility does not typical between the mixture and other material during transport, storage or usage.

### 10.2. Chemical stability

It is stable under normal temperature and pressure during storage and handling.

### 10.3. Possibility of hazardous reactions

The mixture will not enter into hazardous reaction even under excessive pressure or heat.

### 10.4. Conditions to avoid

High temperature, light and moisture may decline the quality of the mixture but will not induce dangerous situation.

### 10.5. Incompatible materials

Not known

### 10.6. Hazardous decomposition mixtures

Not known

---

---

## SECTION 11: TOXICOLOGICAL INFORMATION

---

---

### Information on toxicological effects:

- |                                      |                |
|--------------------------------------|----------------|
| (a) acute toxicity(oral and dermal): | >2000 mg/kg    |
| (b) skin irritation:                 | Non irritating |
| (c) serious eye damage/irritation:   | Non irritating |
| (d) skin sensitisation:              | Non sensitizer |
| (e) germ cell mutagenicity:          | NA             |
| (f) carcinogenicity:                 | NA             |
| (g) reproductive toxicity            | NA             |

### Active substance- bromadiolone:

Repeated dose toxicity:

NOAEL 2.5 µg/ kg bw/day (rat) NOAEL 0.5 µg/kg bw/day (rabbit)

Rat LC50 inhalation

0.43 µg/L (males and females combined)

Reproductive toxicity:

Maternal toxicity (rabbit): LOAEL 2 µg/kg bw/day/ NOAEL < 2 µg/kg bw/day  
Developmental toxicity (rabbit): LOAEL 2 µg/kg bw/day/NOAEL 4 µg/kg bw/day

---

---

## SECTION 12: ECOLOGICAL INFORMATION

---

---

No data are available for the mixture.

12. Ecological information : NA

12.1 Toxicity : NA

12.2 Persistence and degradability : NA

12.3 Bioaccumulative potential : NA

12.4 Mobility in soil : NA

12.5 Results of PBT and vPvB assessment : NA

12.6 Other adverse effects: NA

### ***Toxicity of bromadiolone active ingredient:***

Fish rainbow trout LC<sub>50</sub> (96 h) 2.86 mg/l

Daphnia EC<sub>50</sub> (48 h) 5.8 mg/l

Algae growth inhibition  
*Pseudokirchneriella subcapitata* E<sub>r</sub>C<sub>50</sub> (72h) 1.14 mg/L

### ***Bioaccumulative potential***

Octanol/water partition coefficient (log K<sub>ow</sub>) = 3.8

BCF (calculated from a log K<sub>ow</sub> of 3.8) = 339

---

---

## SECTION 13: DISPOSAL CONSIDERATIONS

---

---

### **Waste treatment methods**

The mixture and its container should be disposed according to the national requirements. In large quantity it should be treated and disposed of as hazardous waste.

Suggested disposal method: incineration

---

---

## SECTION 14: TRANSPORT INFORMATION

---

---

14. Transport information: Non dangerous goods!

14.1 UN number:-

14.2 UN proper shipping name:-

14.3 Transport hazard class(es):-

14.4 Packing group:-

14.5 Environmental hazards:-

14.6 Special precautions for user:-

14.7 Transport in bulk according to Annex II of MARPOL 73/78 and the IBC Code:-

---

---

## SECTION 15: REGULATORY INFORMATION

---

---

Safety, health and environmental regulations/legislation specific for the mixture

-1907/2006/EC Regulation of the European Parliament and of the Council concerning the registration, evaluation, authorization and restriction of chemicals (REACH)

-1272/2008/EC : Regulation on classification, labelling and packaging of substances and mixtures, amending and repealing Directives 67/548/EEC and 1999/45/EC, and amending Regulation (EC) No 1907/2006

-528/2012/EC :Regulation concerning the making available on the market and use of biocidal products

---

---

## SECTION 16: OTHER INFORMATION

---

---

**Full text of hazard identification (H) phrases listed in Section 3**

**Hazard identification (H) phrases**

300 Fatal if swallowed

310 Fatal in contact with skin

330 Fatal if inhaled

372 Causes damage to organs through prolonged or repeated exposure

400 Very toxic to aquatic life

410 Very toxic to aquatic life with long lasting effects

Reason of the new version:

23/08/2013: Section 2 and Section 4 have been updated in line with the conditions of the First Authorisation of the product UK-2013-0772

17/03/2014: Section 2 has been updated in accordance with Regulation (EC) No 1272/2008 (CLP) and Section 7 has been completed with the following sentence:

“keep away from food, drink and animal feeding stuffs”

12/11/2015: update according to the COMMISSION REGULATION (EU) 2015/830 of 28 May 2015 amending Regulation (EC) No 1907/2006

---

*END OF SAFETY DATA SHEET*

---
